The image features a dark gray background with a vertical wood grain texture. Two large, rounded arches are positioned on either side of the center. The arch on the left is a solid dark gray, while the arch on the right is a lighter gray. The word "arch" is written in a bold, black, sans-serif font, centered between the two arches.

arch

arch

The Arch chair and armchair are characterized by timeless elegance. In their form, they refer to the classics, yet thanks to simplified details they gain a modern character. Strong undercuts of the base inspired by arcades suggest classic architecture. The base of each seat is digitally milled, which allows to obtain non-obvious, subtle shapes that can not be achieved by traditional woodworking methods. The backrest exposes a large area of natural wood, and the use of plywood with variable thickness allows for a subtle expression of the furniture. The collection is excellent for prestigious hotels, elegant restaurants and at home.

FΛMEG

candy

candy

Candy coffee tables are characterized by a lightweight, openwork construction that naturally combines traditional wood bending with the latest digital processing technology, yielding soft line details that emphasize the value of natural wood. The balusters give the sculptural form to the tables, referring to the aesthetics of the 1960s. The collection consists of two tables of different heights and distinct shapes of table-tops.

hey

hey

Hey is an alternative to tables with a metal base – it is made entirely of natural wood. Designed for modern restaurants and food courts, it will also fit into any contemporary home interior. All versions of tables from the HEY collection are made of one moulding. The wide plywood is cut into three or four components of the leg, forming a three-legged base for tables with a round top and four-legged for tables with a square top. The legs of both variants can be finished in two ways: semi-circular and sharp or tapering downwards. The tables can be colored in one color or the base and table-top separately - getting a diversified character of the piece of furniture.

The idea behind Hey tables is based on wise, sustainable use of the advantages of plywood bending technology. When producing a leg from one form, we get four versions of the tables. The table base has an elegant form and the place of joining the legs is a characteristic detail of this piece of furniture.

hips

hips

A series of seats designed for contemporary restaurants and food courts, which will also fit into any contemporary home interior. Entirely made of variable thickness plywood, which is a combination of modern elegant design with advanced wood bending technology. The change in thickness used in the seat and in the legs of the chair adds lightness, revealing thin edges while providing a strong structure. Soft, flowing lines of the seat give it a fashionable and friendly character. The seats are available in several versions: without upholstery, upholstered seat only or completely upholstered.

lava

lava

lava

The chair was made of natural wood in combination with an upholstered seat and backrest. Also available with armrest. Chairs from this collection have been designed to harmonize well with the interior maintained in the classical style, but they are also ideal for arranging modern interiors. They are characterized by simplicity of craftsmanship, a form that combined the classic features with modernity, comfort of seating and high quality of materials.

nino

nino
modelli e colori variabili

nino

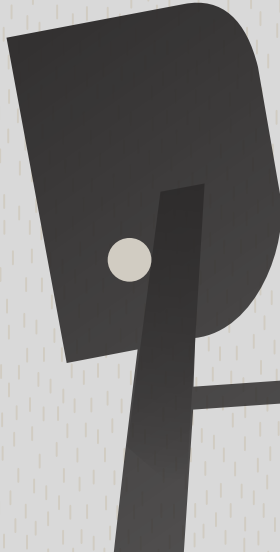

Thanks to Nino, you can create an aesthetic, child-friendly space that is supporting creativity and expression.

The Nino wood chair is perfectly adjusted to the size of the child. It has been designed for pre-school children. The characteristic, curved plywood backrest with a small openwork gives a sense of comfort and safety. The widely-spaced legs of the chair, even with more dynamic play, are stable and durable. Favorite books, blocks, or puzzles will find their place in a practical toy box, this useful piece of furniture will accommodate a lot of toys in special divisions and will help maintain order.

The Nino collection consists of a chair, table, container for toys, a high chair for older children and a fence that allows to separate the play area for children. The furniture is made with attention to detail, from natural, child-friendly materials. Nino will appeal to both children and parents. Perfect for home and commercial spaces.

MINI DESIGN

nopp

Pip is a series of universal chairs with versatile use for gastronomy and home dining rooms. Light, simple and elegant design, small size of the chair, as well as the optional upholstery and distinguishing the colors of the frame, backrest and seat easily allow them to locate them in interiors with functional and aesthetic character.

The chair is distinguished by a characteristic detail in the form of a small ball on the back leg. The ball is a symbol of the whole series, used as a hanger that allows to hang the bag, coat or a nameplate.

The series includes a chair, a chair with armrests, an armchair and a hoker available in two heights.
